# **CONSTRUCTION NOTICE**

# **ELECTRICAL SHUTDOWN**

- Where:** Early Childhood Education Center (ECEC)  
All Areas
- When:** **March 18 – March 22, 2024**
- Scope of Work:** Complete electrical shutdown of the ECEC Campus to allow for the refurbishment and upgrade of the existing main electrical switch gear (SES).
- Reason for Work:** The ECEC Campus was construction in 1997, the existing main electrical switch gear is original, and due to its age (26 years) the electrical service is in need of refurbishment in order to extend its useful like expectancy. Refurbishment will include like for like replacement of existing fusible switches and associated gear along with re-certification of the system. In addition modification and additions to the existing system are required to provide power for the (2) new building additions and new cooling tower. This work can only be accomplished by having the power disconnected at the main service by the electrical provider SRP.

**Anticipated Disruption:**

- Complete electrical shutdown affecting the entire ECEC campus. ALL building ALL areas.
- All building systems including the central plant and HVAC systems will be offline.
- Shutdown is anticipated to last a minimum of three days with a day of preparation and an additional day as a backup to ensure all systems are fully operation before ECEC programs resume.
- Noise and vibration disruptions may occur during construction activities.

*Public Works and the Contractor will endeavor to minimize disruptions due to this work as much as possible.*
